Subject: Sunroom

We just want to let you know how much we have been enjoying the sunroom that you built for us.

We have now lived with the sunroom for several months. We have been through the coldest of days, the hottest of days and even the loss of power for two days. We have used the room every day. In fact, I would say it is the room where we spend the most time.

During the winter, the windows give us a lot of light and made the dark gloomy days of winter much more livable. The combination of the Pella windows and the insulation make the room very tight and quite. The combination of the heated floor and the stove keep the room very comfortable.

During the really hot days this summer, the room was comfortable even without air conditioning. This again is a function of the windows and the insulation.

Thanks for the great job and we highly recommend the use of these products and your firm.
